

VERMI PELLET

PELLETISED PURE WORM CASTINGS
BIOLOGICALLY ACTIVATED NUTRITION

A unique nutrient and biologically rich pelletised fertiliser. Derived from worms fed with composted chicken manure, resulting in a biological active, nutrient rich fertiliser.

- A potent biological innoculant delivering a diverse range of microbial species and stimulants that enhance soil biological function.
- Contains unique enzymes and vitamins that have the ability to chelate locked up soil minerals increasing their absorption by plants.
- A rich source of bio-active carbon, that is highly effective at increasing soil nutrient and water holding capacity.

BENEFITS OF VERMI PELLET

Vermi Pellets are rich in humic acids; helping to increase soil water retention, improve soil aeration and hold plant nutrients that would otherwise leach away.

TYPICAL ANALYSIS (W/W)

TYPICAL ANALYSIS (VV/VV)			
Nitrogen Phosphorus	1.6 % 0.7 %	BIOLOGICAL ANALYSIS	5 mg/kg
Potassium	0.5 %	Total MicroOrganisms	80.9
Sulphur	0.35 %	Total Bacteria	18.2
Carbon	15 %	Total Fungi	59.7
Calcium	4.26 %	Protozoa	3.03
Magnesium	0.77 %	Mycorrhizal Fungi	5.22
Iron	0.95 %	Pseudomonas	2.09
Copper Zinc	84 mg/kg 324 mg/kg	Actinomycetes	2.47
Manganese Boron	443 mg/kg 61 mg/kg	Humic and Fulvic	10-12 %
Molybdenum Cobalt	6.9 mg/kg 5.5 mg/kg	Moisture Content 10-12% Pellet Size 6-10 mm	

RECOMMENDATIONS

	Rate / Ha	Timing	
Broadacre	50-250kg/ha	Apply at crop establishment with fertiliser spreader or airseeder. Alternatively, use as a top dress in crop.	
Horticulture	250-1000kg/ha	Apply pre-plant along drip line or at the bottom of planting hole or row pre-plant. Alternatively can be blanket spread in crop.	
Pastures	50-250kg/ha	Apply at crop establishment with fertiliser spreader or airseeder. Alternatively, use as a top dress in crop.	

Vermi Pellets are best applied at the beginning of the growing season at the first predominant root flush in permanent plantings. This ensures that an adequate level of biology and organic carbon infiltrates the root zone. In short term crops, best practice application is just prior to planting or at planting.

Compatible with many dry fertilisers. Rates and timings may change depending on soil type, rainfall & season. Always consult a LawrieCo Area Manager or distributor for specific recommendations. Check label for more detailed application and handling information.

Available in 25kg, 1 tonne bags or loose bulk.

Manufactured in Australia.
